EDITO

Engaged for almost thirty years in the research and development of biosources in high performance resins, I am sensitive to the environmental impact, which today is more than ever a real issue of life.

Our solvent-free and without Bisphenol A resins meet a real health requirement. While guaranteeing the sustainable sealing performance, they are also adapted to the agri-food sector. We let qualify some of our resins for direct food contact, as SPIRIT (see article below).

Constantly looking for solutions to environmental problems, we are working on the development of a non-toxic permanent antifouling coating to counter the release of toxic compounds of paintings of boats in the oceans.

Thus, we are proud to offer you simple and easy application solutions that meet the expected public health and hygiene requirements.

René MASSARD

PRODUCT OF THE MONTH :

SOUPLETHANE 5 ATE

SOUPLETHANE 5 ATE is a system based on a two-component urethane polyurea resin solvent free and odourless.

This system is applicable for any kind of substrate : concrete, steel, wood, asphalt...

It insures an ongoing waterproofing with no joints, for terraces-roofing, balconies, loggias, passageways and bleachers for private or public use.

This product has an ETA attributed by the CSTB.

EXCELL PLUS FOOD CONTACT

We are pleased to announce the renewal of our qualification EXCELL PLUS FOOD CONTACT for Souplethane SPIRIT (CERTIFICATE N ° 192-16679)

Direct contact / No restriction on use. EXCELL + qualified coating for liquid

waterproofing and anti-corrosion protection of reservoirs, wine process tanks, cellar walls and flooring.

BISPHENOL A-FREE.

KEMISTATIC

Kemistatic will open the 2K PU resins field of applications.

One example : the protection of potable water systems.

Our resins are labelled ACS, French certification for all applications related to potable water management.

Besides offering a full waterproofness and an anticorrosion protection, our resins are completely solvent and bisphenol A free.

Therefore they particularly fit for applications related to potable water management.

All the equipments of the network can be treated : pumps, valves, pipes.

AGENDA

- **Closure of Kemica Coatings' factory from August 5th to 11th, 2019**
- **The Big 5 Qatar**, from September **23rd to 25th**, 2019, in Doha
- **Batimat**, from November **4th to 8th**, 2019, in Paris
- **Vietwater**, from November **6th to 8th**, in Hô Chi Minh Ville
- **Facades2Build exhibition**, November **28th and 29th**, 2019, in Lyon

OUR LAST REALISATIONS

Stone carpet, Aspic Clear

Balcony renovation, Souplethane 5, PU Aqueux, Poudrec

Swimming pool renovation, Souplethane Floor

**KEMICA COATINGS' TEAM IS WISHING
YOU HAPPY SUMMER HOLIDAYS !**
