EDITO

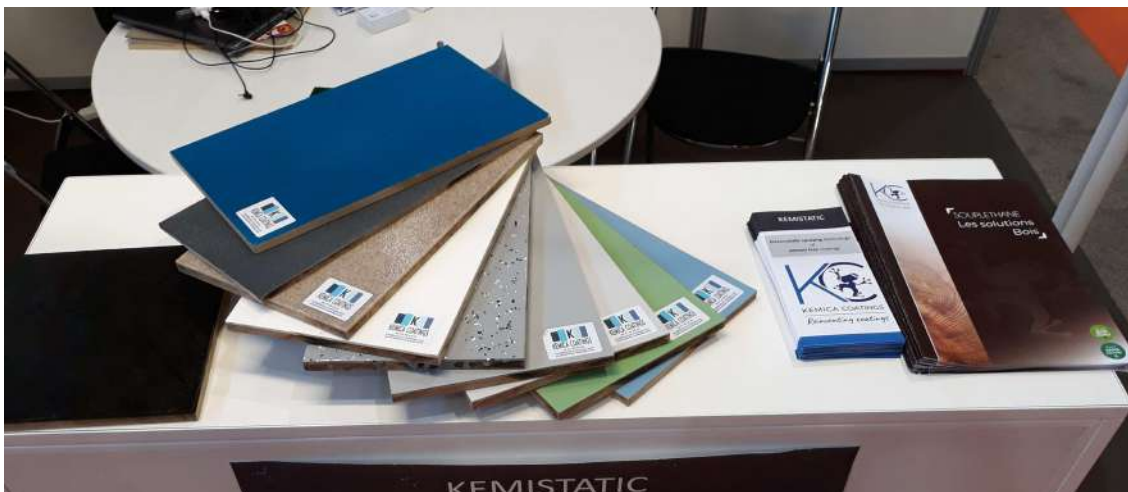

[SOUPLETHANE : A noble product for noble materials](#)

Our resins can protect noble and refined materials as wood, this all-natural material that effectively reduces greenhouse gas emissions.

Our resins can also meet the waterproofing function under vegetated roofs, especially in the context of the HQE (High Quality Environmental) standards.

You got it, our approach is sustainable and eco-responsible : bio-based resins without solvent that correspond to a strong and actual requirement in the field of construction.

KEMISTATIC

We were present at the Eurobois trade show in Lyon from February 4th to 7th. It was the occasion to talk about the Kemistatic project.

EUROBOIS

 THE TIMBER, WOODWORKING MACHINERY,
AND FITTING-OUT TRADE SHOW

SOUPLETHANE 5 ATE

The SOUPLETHANE 5 ATE is composed of a two-component, solvent-free and odour-free polyurea-urethane resin that is cold-polymerized.

This system can be used on new works but also for rehabilitation and on all types of substrate : concrete, steel, wood, bitumen, asphalt, resins. It ensures a continuous waterproofing, without joints, for terraces-roofing, balconies, loggias, passageways and bleachers for private or public use.

This product has an ETA attributed by the CSTB.

GREEN ROOF

Application of SOUPLETHANE 5 ATE resin, solvent free and odour-free, directly on the bituminous membrane to receive a revegetation complex. Thanks to the resistance to compression higher than 100MPa, the product is suitable for "root protection" (the roots cannot pass through the resin and destroy the waterproofing).

Project realized by [VERTIGE INTERNATIONAL](#) in Bordeaux on a 200m² surface.

TRADE SHOWS

Carrefour des gestions locales de l'eau, January 29th

Eurobois trade show, from February 4th to February 7th

COMING SOON

NAVEXPO

International

Navexpo trade show, from 1 to 3 April at Lorient port

OUR LAST REALISATIONS

Coating of a ventilation box, SILTHEK

Waterproofing of a potable water tank with SOUPLETHANE WP

Application of Souplethane 5N in nuclear industry
