According to regulation according to Regulation (EC) No. 1907/2006

PRIMAIRE (PRIMER) PU AQUEUX

Version Revision date (english version):2.0 14.02.2019 (Cancel and replace the SDS of 24/07/2015)

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier	
Trade name	: PRIMAIRE (PRIMER) PU AQUEUX
Index No	: NA
CE No.	: NA
CAS No.	: NA
REACH Registration No.	: The product is a mixture, no need to be REACH registered.
Product description : mixture	
Origin: organic, isocyanates -	- MDI (methyl diisocyanate)

1.2 Relevant identified uses of the substance or mixture and uses advised against

Use of the Substance/Mixture : Primer. Component of a polyurethane system.

1.3 Details of the supplier of the safety data sheet

Company	: KEMICA COATINGS
Adress	: Z.A. DU BOIS GUESLIN
	28630 MIGNIERES
	FRANCE
Telephone	: +33 (0)2 37 26 39 87
	+33 (0)2 37 26 33 56

E-mail address of person : info@kemica-coatings.com responsible for the SDS

1.4 Emergency telephone number

National Advisory Body / Poison Center

France : ORFILA

Telephone : +33 (0)1 45 42 59 59

<u>Supplier</u>

Telephone : +33 2 37 26 33 56

SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Product description – substance type – Composition : mixture

Classification (REGULATION (EC) No 1272/2008)

Acute Tox. 4 H332: Harmful if inhaled.
Skin Corr. 2 H315: Causes skin irritation.
Eye Dam. 2 H319: Causes serious eye irritation.
Resp. Sens. 1 H334: May cause allergy or asthma symptoms or breathing difficulties if inhaled.
Skin. Sens. 1 H317: May cause an allergic skin reaction.
Carc. 2 H351: Suspected of causing cancer.
STOT SE 3 H335: May cause respiratory irritation.
STOT RE 2 H373: May cause damage to organs through prolonged or repeated exposure.

2.2. Label elements

Labelling (REGULATION (EC) No 1272/2008)

Hazard pictograms

According to regulation according to Regulation (EC) No. 1907/2006

PRIMAIRE (PRIMER) PU AQUEUX

Version Revision date (english version):

2.0 14.02.2019 (Cancel and replace the SDS of 24/07/2015)

: Danger	
: H315	Causes skin irritation.
H317	May cause an allergic skin reaction.
H319	Causes serious eye irritation.
H332	Harmful if inhaled.
	May cause allergy or asthma symptoms or
H334	breathing difficulties if inhaled.
H335	May cause respiratory irritation.
H351	Suspected of causing cancer.
	May cause damage to organs through
H373	prolonged or repeated exposure.
: Prevention:	
	Do not breathe dust/ fume/ gas/ mist/
P260	vapours/ spray.
	Wear protective gloves/ protective clothing/
P280	eye protection/ face protection.
	In case of inadequate ventilation wear
P285	respiratory protection.
Response:	
P304 + P340	IF INHALED: Remove person to fresh air
	and keep comfortable for breathing.
P305 + P351 +	P338 IF IN EYES: Rinse cautiously with water
	for several minutes. Remove contact
	lenses, if present and easy to do. Continue
	rinsing.
P302 + P352	IF ON SKIN: Wash with plenty of soap and water.
P309 + P311	IF exposed or if you feel unwell: Call a
	POISON CENTER or doctor/ physician.
Disposal:	
P501	Dispose of contents and container in
accordance with regulations.	all local, regional, national and international
	H317 H319 H332 H334 H335 H351 H373 Prevention: P260 P280 P280 P280 P285 Response: P304 + P340 P305 + P351 + P302 + P352 P309 + P311 Disposal: P501 accordance with

Hazardous components which must be listed on the label:

Isocyanate prepolymer

Isocyanic acid, polymethylenepolyphenylene ester

methylenediphenyl diisocyanate

lsocyanic acid, polymethylenepolyphenylene ester, polymer with .alpha.-methyl-.omega.hydroxypoly(oxy-1,2-ethanediyl)

Isocyanic acid, polymethylenepolyphenylene ester, polymer with alpha-methyl-omegahydroxypoly (oxy-1,2-ethanediyl) and alpha-hydro-omega-hydroxypoly[oxy(methyl-1,2-ethanediyl)]

Additional Labelling:

EUH204 Contains isocyanates. May produce an allergic reaction.

2.3 Other hazards

This substance/mixture contains no components considered to be either persistent, bioaccumulative and toxic (PBT), or very persistent and very bioaccumulative (vPvB) at levels of 0.1% or higher.

SECTION 3: Composition/information on ingredients

3.1. Substances N.A.

According to regulation according to Regulation (EC) No. 1907/2006

PRIMAIRE (PRIMER) PU AQUEUX

For explanation of abbreviations see section 16.

SECTION 4: First aid measures

4.1 Description of first aid measures

General advice:

According to regulation according to Regulation (EC) No. 1907/2006

PRIMAIRE (PRIMER) PU AQUEUX

Version Revision date (english version):2.0 14.02.2019 (Cancel and replace the SDS of 24/07/2015)

Move out of dangerous area. Do not leave the victim unattended. Get medical attention immediately if symptoms occur. Show this safety data sheet to the doctor in attendance.

4.1.1. If inhaled :

If breathed in, move person into fresh air. Call a physician or poison control centre immediately. Keep patient warm and at rest. Keep respiratory tract clear. If breathing is difficult, give oxygen. If breathing is irregular or stopped, administer artificial respiration. If unconscious, place in recovery position and seek medical advice. Consult a physician immediately if symptoms such as shortness of breath or asthma are observed. A hyper-reactive response to even minimal concentrations of diisocyanates may develop in sensitised persons. The exposed person may need to be kept under medical surveillance for 48 hours. LC50 (rat) : ca. 490 mg/m³ (4 hours) : using experimentally produced respirable aerosol having aerodynamic diameter <5microns.

4.1.2. In case of skin contact :

In case of contact, immediately flush skin with soap and plenty of water. Take off contaminated clothing and shoes immediately. Wash contaminated clothing before reuse. Thoroughly clean shoes before reuse. Call a physician if irritation develops or persists. An MDI study has demonstrated that a polyglycol-based skin cleanser (such as D-TamTM, PEG-400) or corn oil may be more effective than soap and water.

4.1.3. In case of eye contact :

Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. If easy to do, remove contact lens, if worn. Protect unharmed eye. Keep eye wide open while rinsing. If eye irritation persists, consult a specialist.

4.1.4. If swallowed :

Gently wipe or rinse the inside of the mouth with water. DO NOT induce vomiting unless directed to do so by a physician or poison control center. Keep respiratory tract clear. Keep at rest. If a person vomits when lying on his back, place him in the recovery position. Never give anything by mouth to an unconscious person. Take victim immediately to hospital. If symptoms persist, call a physician.

4.2. Most important symptoms and effects, both acute and delayed :

Symptoms : Severe allergic skin reactions, bronchiospasm and anaphylactic choc Risks : This product is a respiratory irritant and potential respiratory sensitiser: repeated inhalation of vapour or aerosol at levels above the occupational exposure limit could cause respiratory sensitisation. Symptoms may include irritation to the eyes, nose, throat and lungs, possibly combined with dryness of the throat, tightness of chest and difficulty in breathing. The onset of the respiratory symptoms may be delayed for several hours after exposure. A hyperreactive response to even minimal concentrations of MDI may develop in sensitised persons.

4.3. Indication of any immediate medical attention and special treatment needed :

Treatment : Symptomatic and supportive therapy as needed. Following severe exposure medical follow-up should be monitored for at least 48 hours.

The first aid procedure should be established in consultation with the doctor responsible for industrial medicine.

SECTION 5: Firefighting measures

5.1 Extinguishing media

Suitable extinguishing media : Use extinguishing measures that are appropriate to local circumstances and the surrounding environment. Foam, Carbon dioxide (CO2), Dry powder

Unsuitable extinguishing media : Water may be used if no other available and then in copious quantities. Reaction between water and hot isocyanate may be vigorous.

5.2. Special hazards arising from the substance or mixture :

Specific hazards during firefighting : Do not allow run-off from fire fighting to enter drains or water courses. The pressure in sealed containers can increase under the influence of heat.

Exposure to to decomposition products may be a hazard to health.

According to regulation according to Regulation (EC) No. 1907/2006

PRIMAIRE (PRIMER) PU AQUEUX

Version	Revision date (english version):
2.0	14.02.2019 (Cancel and replace the SDS of 24/07/2015)

Hazardous combustion products : Combustion products may include: carbon monoxide, carbon dioxide, nitrogen oxides, hydrocarbons and HCN. In the event of extreme heat

5.3 Advice for firefighters

Special protective equipment : for firefighters	Wear an approved positive pressure self-contained breathing apparatus in addition to standard fire fighting gear. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.
Specific extinguishing methods :	Cool containers/tanks with water spray.
Further information :	Standard procedure for chemical fires. Due to reaction with water producing CO2-gas, a hazardous build-up of pressure could result if contaminated containers are re-sealed.Collect contaminated fire extinguishing water separately. This must not be discharged into drains. Prevent fire extinguishing water from contaminating surface water or the ground water system.Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations.

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Immediately evacuate personnel to safe areas. Use personal protective equipment. If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. Ensure adequate ventilation. Keep people away from and upwind of spill/leak. Only qualified personnel equipped with suitable protective equipment may intervene. For additional precautions and advice on safe handling, see section 7. Never return spills in original containers for re-use. Make sure that there is a sufficient amount of neutralizing/ absorbent material near the storage area. The danger areas must be delimited and identified using relevant warning and safety signs. Treat recovered material as described in the section "Disposal considerations". For disposal considerations see section 13.

6.2 Environmental precautions

Do not allow uncontrolled discharge of product into the environment. Do not allow material to contaminate ground water system. Prevent product from entering drains. Prevent further leakage or spillage if safe to do so. Local authorities should be advised if significant spillages cannot be contained. If the product contaminates rivers and lakes or drains inform respective authorities.

6.3 Methods and material for containment and cleaning up

Clean-up methods - small spillage

Contain spillage, soak up with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and transfer to a container for disposal according to local / national regulations (see section 13). Clean contaminated surface thoroughly. Sweep up or vacuum up spillage and collect in suitable container for disposal. Neutralize small spillages with decontaminant. The compositions of liquid decontaminants are given in Section 16. Remove and dispose of residues.

Clean-up methods - large spillage

If the product is in its solid form: Spilled MDI flakes should be picked up carefully. The area should be vacuum cleaned to remove remaining dust particles completely. If the product is in its liquid form: Soak up with inert absorbent material (e.g. sand, silica gel, acid binder, universal binder, sawdust). Leave to react for at least 30 minutes. Shovel into open-top drums for further decontamination. Wash the spillage area with water. Test atmosphere for MDI vapour. Keep in suitable, closed containers for disposal.

6.4 Reference to other sections

For personal protection see section 8., For disposal considerations see section 13., The compositions of liquid decontaminants are given in Section 16.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

According to regulation according to Regulation (EC) No. 1907/2006

PRIMAIRE (PRIMER) PU AQUEUX

Version Revision date (english version): 2.0 14.02.2019 (Cancel and replace the SE

14.02.2019 (Cancel and replace the SDS of 24/07/2015)

Technical measures : Ensure that eyewash stations and safety showers are close to the workstation location.

Local/Total ventilation : Use only with adequate ventilation.

Advice on safe handling : For personal protection see section 8. Avoid formation of aerosol. Do not breathe vapours or spray mist. Do not breathe vapours/dust. Do not swallow. Do not get in eyes or mouth or on skin. Do not get on skin or clothing. Avoid exposure - obtain special instructions before use. Smoking, eating and drinking should be prohibited in the application area. Provide sufficient air exchange and/or exhaust in work rooms. Keep container closed when not in use. Open drum carefully as content may be under pressure. Dispose of rinse water in accordance with local and national regulations. Persons susceptible to skin sensitisation problems or asthma, allergies, chronic or recurrent respiratory disease should not be employed in any process in which this mixture is being used.

Advice on protection against fire and explosion : Normal measures for preventive fire protection.

Hygiene measures : Handle in accordance with good industrial hygiene and safety practice. Wash face, hands and any exposed skin thoroughly after handling. Remove contaminated clothing and protective equipment before entering eating areas. When using do not eat, drink or smoke. Contaminated work clothing should not be allowed out of the workplace. Wash hands before breaks and immediately after handling the product. Wash hands before breaks and at the end of workday.

7.2 Conditions for safe storage, including any incompatibilities

Requirements for storage areas and containers : Keep containers tightly closed in a dry, cool and wellventilated place. Keep in properly labelled containers. Observe label precautions. Protect from moisture. Electrical installations / working materials must comply with the technological safety standards. Containers which are opened must be carefully resealed and kept upright to prevent leakage.

Advice on common storage : Acids, Amines, Bases, Metals, water

Further information on storage stability : No decomposition if stored and applied as directed.

7.3 Specific end use(s)

No data available

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Contains no substances with occupational exposure limit values.

Derived No Effect Level (DNEL) according to Regulation (EC) No. 1907/2006:

Substance name	End use	Exposure routes	Potential health effects	Value
Isocyanic acid, polymethylenepolyphe nylene ester	Workers	Dermal	Systemic effects, Short-term exposure	50 mg/kg bw/day
	Workers	Inhalation	Systemic effects, Short-term exposure	0,1 mg/m3
	Workers	Dermal	Local effects, Short- term exposure	27,8 mg/kg bw/day
	Workers	Inhalation	Local effects, Short- term exposure	0,1 mg/m3
	Workers	Inhalation	Long-term - systemic effects	0,05 mg/m3
	Workers	Inhalation	Long-term – local effects	0,05 mg/m3

8.2 Exposure controls

Eye protection

Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists or dusts. Chemical splash goggles. Always wear eye protection when the potential for inadvertent eye contact with the product cannot be excluded. Please follow all applicable local/national requirements when selecting protective measures for a specific workplace. Ensure that eyewash stations and safety showers are close to the workstation location.

Hand protection

Remarks : Protective gloves should be worn when handling freshly made polyurethane products to avoid contact with trace residual materials which may be hazardous in contact with skin.

Use chemical resistant gloves classified under Standard EN374: protective gloves against chemicals and microorganisms. Examples of glove materials that might provide suitable protection include: Butyl rubber, Chlorinated polyethylene, Polyethylene, Ethyl vinyl alcohol copolymers laminated ("EVAL"), Polychloroprene (Neoprene*), Nitrile/butadiene rubber ("nitrile" or "NBR"), Polyvinyl chloride ("PVC" or "vinyl"), Fluoroelastomer (Viton*). When prolonged or frequently repeated contact may occur, a glove with protection class of 5 or higher (breakthrough time greater than 240 minutes according to EN374) is recommended. When only brief contact is expected, a glove with protection class of 3 or higher (breakthrough time greater than 60 minutes according to EN374) is recommended. Contaminated gloves should be decontaminated and disposed of. Notice: The selection of a specific glove for a particular application and duration of use in a workplace should also take into account all requisite workplace factors such as, but not limited to : other chemicals that may be handled, physical requirements (cut/puncture protection, dexterity, thermal protection), as well as instructions/specifications provided by the glove supplier.

The selected protective gloves have to satisfy the specifications of EU Directive 89/686/EEC and the standard EN 374 derived from it.

Skin and body protection

Impervious clothing. Choose body protection according to the amount and concentration of the dangerous substance at the work place.

Recommended:

Overall (preferably heavy cotton) or Tyvek-Pro Tech 'C', Tyvek Pro 'F' disposable coverall.

Respiratory protection

Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary.

Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

In emergency, non-routine and unknown exposure situations, including confined space entries, a NIOSH-certified full facepiece pressure demand self-contained breathing apparatus (SCBA)or a full facepiece pressure demand supplied air respirator (SAR) with auxiliary self-contained air supply, should be used.

Protective measures

Personal protective equipment comprising: suitable protective gloves, safety goggles and protective clothing. The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace. Ensure that eye flushing systems and safety showers are located close to the working place.

According to regulation according to Regulation (EC) No. 1907/2006

9.2 Other information

No data available

SECTION 10: Stability and reactivity

10.1 Reactivity

No dangerous reaction known under conditions of normal use.

10.2 Chemical stability

Stable under normal conditions.

10.3 Possibility of hazardous reactions

Hazardous reactions : Reaction with water (moisture) produces CO2-gas. Exothermic reaction with materials containing active hydrogen groups. The reaction becomes progressively more vigorous and can be violent at higher temperatures if the miscibility of the reaction partners is good or is supported by stirring or by the presence of solvents. MDI is insoluble with, and heavier than water and sinks to the bottom but reacts slowly at the interface. A solid water-insoluble layer of polyurea is formed at the interface by liberating carbon dioxide gas.

10.4 Conditions to avoid

According to regulation according to Regulation (EC) No. 1907/2006

PRIMAIRE (PRIMER) PU AQUEUX

KEMICA COATINGS

VersionRevision date (english version):2.014.02.2019 (Cancel and replace the SDS of 24/07/2015)

Conditions to avoid :

Extremes of temperature and direct sunlight. Exposure to air or moisture over prolonged periods.

10.5 Incompatible materials

Materials to avoid : Acids, Amines, Bases, Metals, water

10.6 Hazardous decomposition products

Combustion products may include : carbon monoxide, carbon dioxide, nitrogen oxides, hydrocarbons and HCN. In the event of extreme heat (>500 degrees C), aniline is suspected of being formed.

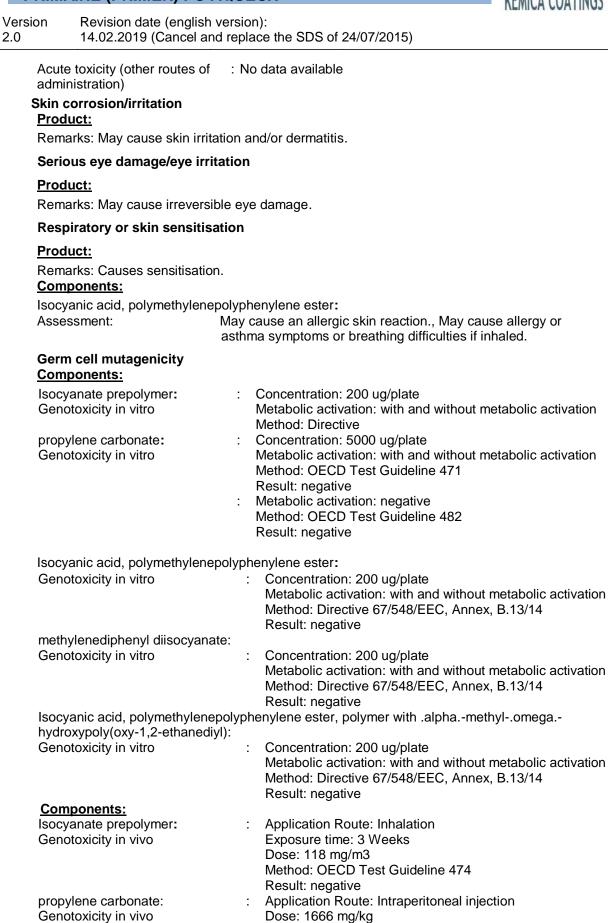

SECTION 11: Toxicological information

11.1 Information on toxicological effects

Acute toxicity <u>Components:</u> Isocyanate prepolymer:	
Acute oral toxicity	: LD50 (Rat, male): > 10 000 mg/kg Method: OECD Test Guideline 401
Propylene carbonate: Acute oral toxicity	: LD50 (Rat, male et female): 33 520 mg/kg
Isocyanic acid, polymethylenepo Acute oral toxicity	olyphenylene ester: : LD50 (Rat, male): > 10 000 mg/kg Method: OECD Test Guideline 401
methylenediphenyl diisocyanate Acute oral toxicity Assessment: The substance or	e: : LD50 (Rat, male et female): > 2 000 mg/kg mixture has no acute oral toxicity
Isocyanic acid, polymethylenepo hydroxypoly(oxy-1,2-ethanediyl) Acute oral toxicity	oly phenylene ester, polymer with .alphahydroomega): : LD50 (Rat, male): > 10 000 mg/kg
	 Method: OECD Test Guideline 401 Assessment: The substance/mixture is not toxic on inhalation as defined by dangerous goods regulations.
<u>Composants:</u>	Acute toxicity estimate : 1,75 mg/l Exposure time: 4 h Test atmosphere: dust/mist Method: Calculation method
Isocyanate prepolymer: Acute dermal toxicity	: LD50 (Rabbit, male and female): > 9 400 mg/kg Method: OECD Test Guideline 402
Propylene carbonate: Acute dermal toxicity	: LD50 (Rabbit, male and female): > 3 000 mg/kg Method: OECD Test Guideline 402 LD50 (Rabbit, male and female): > 2 000 mg/kg Method: OECD Test Guideline 402
Isocyanic acid, polymethylenepo Acute dermal toxicity	olyphenylene ester: : LD50 (Rabbit, male and female): > 9 400 mg/kg Method: OECD Test Guideline 402
methylenediphenyl diisocyanate Acute dermal toxicity	e: : LD50 (Rabbit, male and female): > 9 400 mg/kg Method: OECD Test Guideline 402 oly phenylene ester, polymer with .alphahydroomega
hydroxypoly(oxy-1,2-ethanediyl) Acute dermal toxicity

Result: negative

Isocyanic acid, polymethylenepolyphenylene ester:

Genotoxicity in vivo	Application Route: Inhalation Result: Not classified due to inconclusive data. Application Route: Inhalation Exposure time: 3 Weeks Dose: 113 mg/m3 Method: OECD Test Guideline 474 Result: negative
Genotoxicity in vivo	Application Route: Inhalation Exposure time: 3 Weeks Dose: 118 mg/m3 Method: OECD Test Guideline 474 Result: negative

Isocyanic acid, polymethylenepolyphenylene ester, polymer with .alpha.-methyl-.omega.hydroxypoly(oxy-1,2-ethanediyl):

Genotoxicity in vivo	: Application Route: Inhalation Result: Not classified due to inconclusive data. Application Route: Inhalation Exposure time: 3 Weeks Dose: 113 mg/m3 Method: OECD Test Guideline 474 Result: regestive
	Result: negative

Carcinogenicity

Product: Remarks: Rats have been exposed for two years to a respirable aerosol of polymeric MDI which resulted in a chronic pulmonary irritation at high concentrations. Only at the top level (6 mg/m3), there was a significant incidence of a benign tumour of the lung (adenoma) and one malignant tumour (adenocarcinoma). There were no lung tumours at 1 mg/m3 and no effects at 0.2 mg/m3. Overall, the tumour incidence, both benign and malignant, and the number of animals with the tumours were not different from controls. The increased incidence of lung tumours is associated with prolonged respiratory irritation and the concurrent accumulation of yellow material in the lung, which occurred throughout the study. In the absence of prolonged exposure to high concentrations leading to chronic irritation and lung damage, it is highly unlikely that tumour formation will occur.

Components:

Isocyanate prepolymer: Carcinogenicity - Assessment	:	Limited evidence of carcinogenicity in animal studies
Isocyanic acid, polymethylenepolyp	bhe	enylene ester:
Carcinogenicity - Assessment	:	Suspected human carcinogens
methylenediphenyl diisocyanate: Carcinogenicity - Assessment	:	Limited evidence of carcinogenicity in animal studies
Isocyanic acid, polymethylenepolyphydroxypoly(oxy-1,2-ethanediyl):	bhe	enylene ester, polymer with .alphamethylomega
Carcinogenicity - Assessment	:	Limited evidence of carcinogenicity in animal studies

to be either persistent, bioaccumulative and toxic (PBT), or very persistent and very bioaccumulative (vPvB) at levels of 0.1% or higher.

12.6 Other adverse effects

Product:	
Additional ecological	: No data available
information	

SECTION 13: Disposal considerations

13.1 Waste treatment methods

Product

 Do not dispose of waste into sewer.
 Do not contaminate ponds, waterways or ditches with chemical or used container.
 Send to a licensed waste management company.

Contaminated packaging	:	Empty remaining contents. Dispose of as unused product.
		Do not re-use empty containers.

SECTION 14: Transport information

IATA Not regulated as dangerous goods IMDG Not regulated as dangerous goods ADR Not regulated as dangerous goods RID Not regulated as dangerous goods

14.7 Transport in bulk according to Annex II of Marpol and the IBC Code

Not applicable for product as supplied.

SECTION 15: Regulatory information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

REACH - Candidate List of Substances of Very High Concern for Authorisation (Article 59).	: This product does not contain substances of very high concern (Regulation (EC) No 1907/2006 (REACH), Article 57).
REACH - List of substances subject to authorisation (Annex XIV)	: Not applicable
REACH - List of substances subject to authorisation -	: Not applicable
Future sunset date	

Occupational Illnesses (R- : 62 461-3, France)

Other regulations:

Take note of Directive 92/85/EEC regarding maternity protection or stricter national regulations, where applicable.

Take note of Directive 94/33/EC on the protection of young people at work or stricter national regulations, where applicable.

According to regulation according to Regulation (EC) No. 1907/2006
